CSS rgb() Function

◀ CSS Functions Reference

Example

Define different RGB colors:

```
#p1 {background-color:rgb(255,0,0);} /* red */
#p2 {background-color:rgb(0,255,0);} /* green */
#p3 {background-color:rgb(0,0,255);} /* blue */
```

Try it Yourself »

Definition and Usage

The rgb() function define colors using the Red-green-blue (RGB) model.

An RGB color value is specified with: rgb(red, green, blue). Each parameter defines the intensity of that color and can be an integer between 0 and 255 or a percentage value (from 0% to 100%).

For example, the rgb(0,0,255) value is rendered as blue, because the blue parameter is set to its highest value (255) and the others are set to 0.

Version: CSS2

Browser Support

The numbers in the table specify the first browser version that fully supports the function.

Function					
rgb()	1.0	4.0	1.0	1.0	3.5

CSS Syntax

rgb(*red*, *green*, *blue*)

Value	Description
<i>red</i>	Defines the intensity of red as an integer between 0 and 255, or as a percentage value between 0% and 100%
<i>green</i>	Defines the intensity of green as an integer between 0 and 255, or as a percentage value between 0% and 100%
<i>blue</i>	Defines the intensity of blue as an integer between 0 and 255, or as a percentage value between 0% and 100%
